

# Paediatric Emergency Department

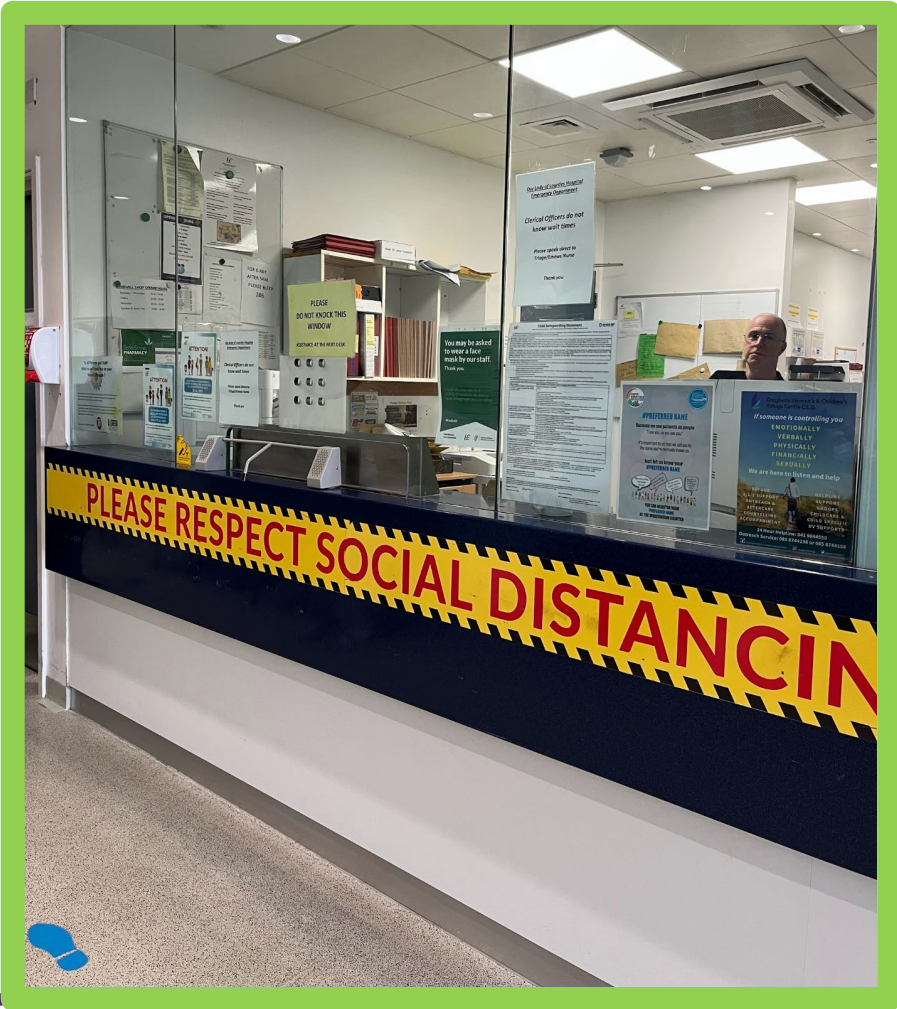

This is the entrance to the emergency department.

This is where i go when i need to see a doctor as soon as possible.

This is the emergency department reception.

This is where i will register for my visit to the emergency room.

At the reception, I will answer some questions about my name and details. My carer can help me with this if i need.

This tells the nurses and doctors that i am waiting to see them.

This is the waiting area.

I will wait here until the nurse is ready to see me.

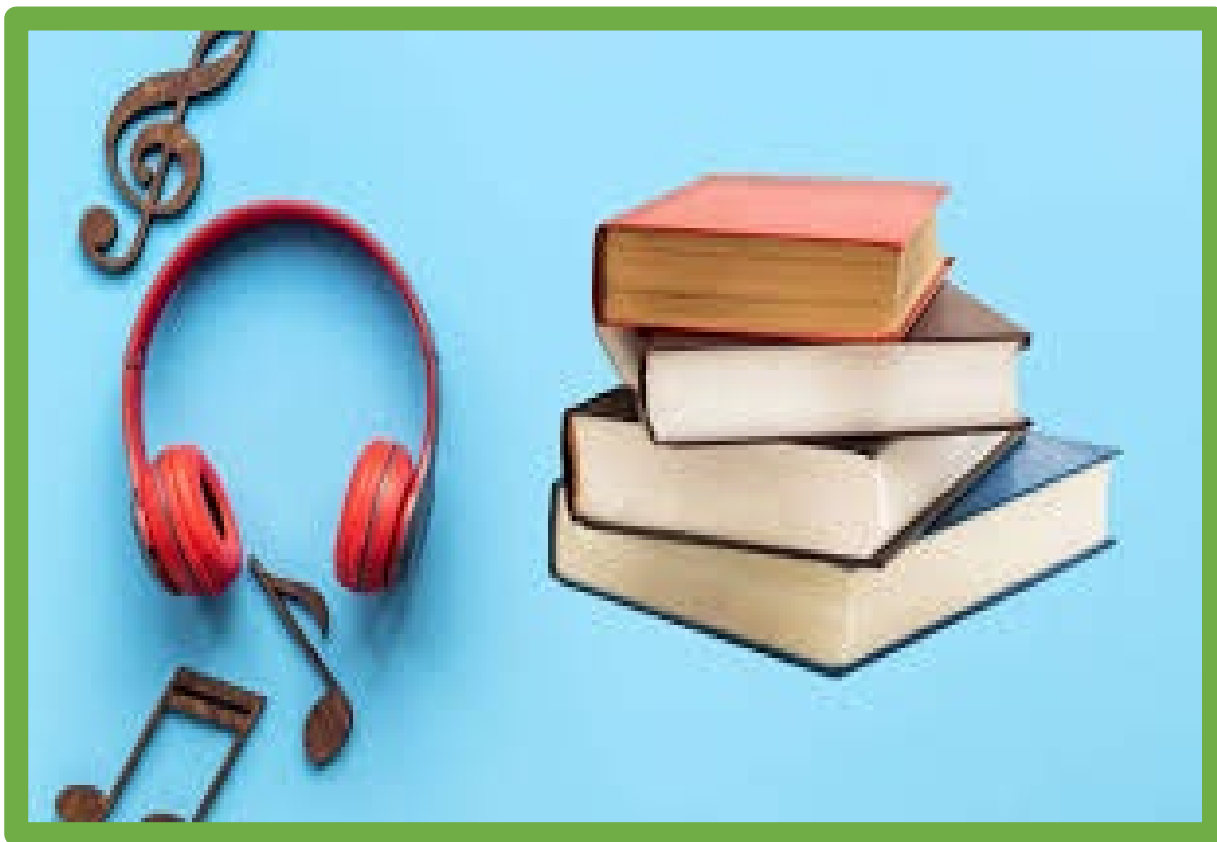

Sometimes, in the hospital,  
there might be

Loud noises

Bright lights

Strong smells

I can use things can make me  
feel better like ear defenders, a  
blanket or food.

I might have to wait here for a while.

I can play with my favourite toys, read a book, listen to music or watch my device.

The nurse will call my name  
when she is ready to see me.

This is the room i will go to when  
seeing the nurse.

Here the nurse will ask me questions about how i am feeling.

My caregiver can help me to answer the nurses questions.

The nurse will check my temperature using a thermometer.

They will hold the thermometer near my forehead for a few seconds. This will not hurt me.

The nurse will listen to my heartbeat using a stethoscope.

I may need to pull up my shirt to let the nurse hear properly.

This will feel cold but will not hurt me.

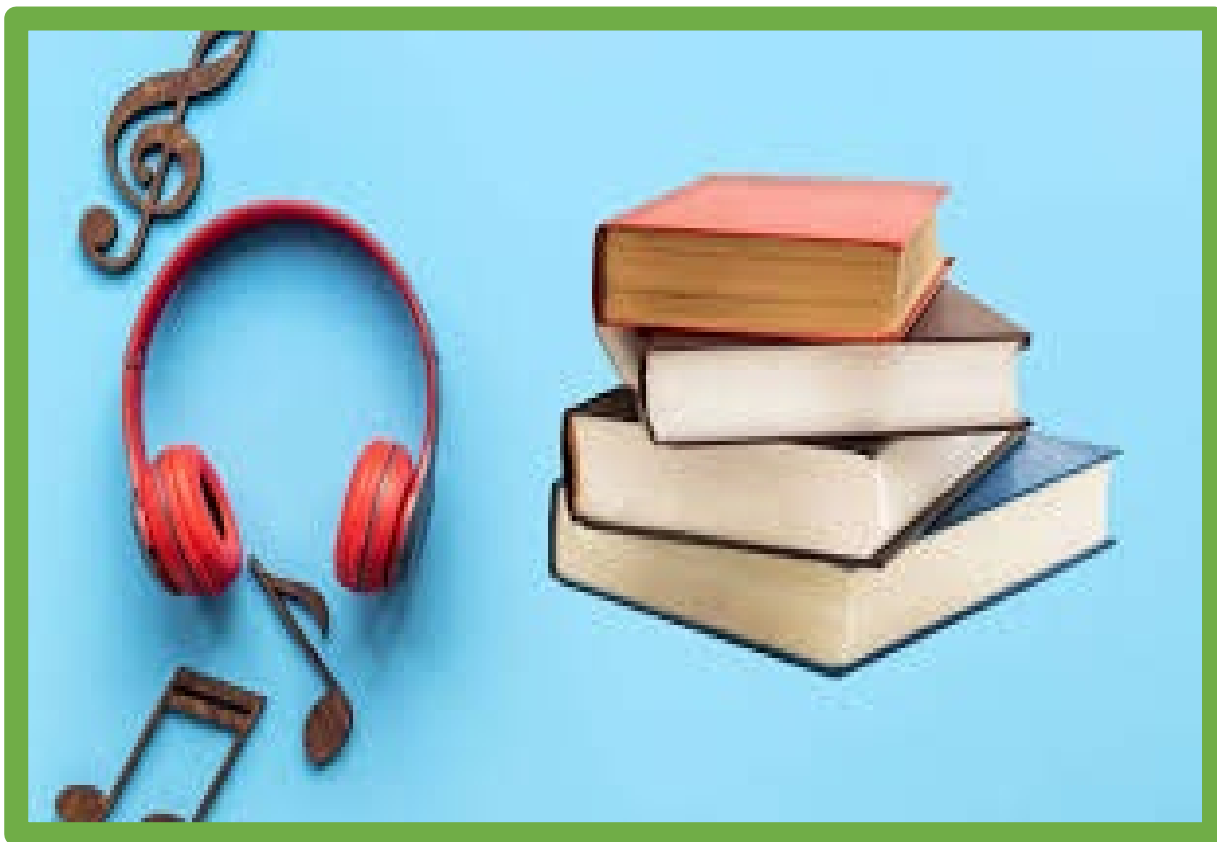

Now i am finished with the nurse.

I need to wait to see the doctor.

I can return to the waiting room until the doctor is ready to see me.

I might have to wait here for a while.

I can play with my favourite toys, read a book, listen to music or watch my device.

When the doctor is ready to see me, I will go with him to a room like this.

The doctor will find out why i am sick and help me get better.

The doctors and nurses will take care of me until i am well enough to go home.

I will have a bed to rest in.

I might need to stay overnight.

My caregiver can stay with me  
so i won't be alone.

Now that i am well enough, i can go home.

Before i leave the emergency department, my caregiver will speak with the doctors.

I might need to take medicine  
and rest at home for a few  
more days so i can get better.

I have now finished my visit to  
the emergency department.

Now I will:
